Our Story

We are Storytellers, Curators, and Innovators

It is our mission to foster the art of fulldome film making and the immersive creator ecosystem. We have gathered an interdisciplinary community of some of the most talented artists, filmmakers, technologists, and experience designers to push the boundaries of immersive storytelling and design.

We have created some of the world's most recognizable and highly acclaimed animated and live-action fulldome films. Under the Cosm Studios banner, we will continue to develop a variety of educational works for the science community while expanding to include broader immersive experiences.

Content Creation

We direct, produce, co-produce, and commission films for the science and education market. We are also pushing the boundaries of fulldome by building entirely new immersive experiences for our partners and audiences to enjoy. This will enable institutions to broaden their audience base and increase audience retention.

A Robust and Diverse Show Library

Cosm Studios proudly offers the industry's most comprehensive fulldome show library. All shows are in fulldome format with stereo and/or 5.1 surround sound and compatible with any manufacturer's fulldome system.

BLACK HOLE

FIRST PICTURE

4K

8K

2023 25 min

Languages: EN, CN

Producer: Cosm Studios

Genre: Astronomy, Cosmology

Following a journey of human perseverance, ingenuity, and imagination, full-dome film *Black Hole First Picture* encapsulates a historic milestone in science visualization and discovery – witnessing a phenomenon widely believed to be invisible: a black hole. Planetarium audiences around the world are taken on a quest that examines worldwide radio sites that comprise the Event Horizon Telescope (a global network of synchronized radio observatories that work in unison to capture images of black holes), peers into the core of the Messier 87 galaxy, and travels to the heart of the Milky Way to produce the first-ever picture of a black hole.

Genre: Cosmology, Life Science & Nature, Solar System, Space Science & Astronomy, Weather

For over two decades, Oasis in Space has remained one of Spitz's most popular and evergreen productions. In 2022, the entire show was remastered with a gorgeous, live-performer score, brilliant new visual effects and an updated script that reflects current advances in space science. Once more, we are ready to take the audience on a rich and fascinating journey through our celestial neighborhood, as we look for one of organic life's key ingredients – liquid water.

ATLAS

of a Changing Earth:
Mapping Our Climate Future

4K

8K

2022

25 min

Languages: EN, SP

Producer: Cosm Studios

Genre: Astronomy, Climate Change, Global Warming

This is the story of how a revolution in one of the most basic of all human enterprises – the making of maps – is shedding new light on our planet’s evolution in the wake of rising global temperatures. It builds on the success of two award-winning Earth science films distributed by Spitz and Evans & Sutherland: *Dynamic Earth: Exploring Earth’s Climate Engine* (2012) and *Birth of Planet Earth* (2019).

MARS

ONE THOUSAND ONE

2018

52 min, 42 min, 30 min

Languages: EN, GE, DU, FR, JP, MA

Producer: Mirage3D, E&S, GOTO Inc

Genre: Space Travel

An international crew of astronauts is about to embark on the first interplanetary journey in history, the first manned mission to the surface of Mars. Reporter Miles O'Brien is reporting live from his Space Headquarters TV Studio in New York while events unfold for the crew on their 1001 day long mission.

We will witness firsthand their brave attempts to put human footprints on Mars and return safely to Earth. This journey is made possible by the biggest engineering feat ever and loaded with scientific experiments. The explorers will be extending our knowledge of Mars and will be learning whether or not mankind has a future among the stars. Experience the thrill of the grandest mission of exploration ever undertaken!

Space Explorers

The ISS Experience

4K

2021 20 min

In spring 2021, Felix & Paul Studios sent the first-ever cinematic 3D 360° camera designed to operate in the vacuum of space to the International Space Station. The result is a spectacular fully immersive experience that will allow you to witness the world's first spacewalk captured in cinematic VR as if you were actually there. Take in a view of our world like never before. Features ESA Astronaut Thomas Pesquet and JAXA Astronaut Akihiko Hoshide.

Languages: EN

Producer: Felix & Paul Studios

Genre: Astronomy, Live Action

Moonbase:

The Next Step

4K

2022 20 min

Moonbase: The Next Step is the story of this human endeavour, pushing scientific and technological advances to the limit. Traveling the 250,000 miles and surviving the hostile and alien conditions of reduced gravity, extreme temperatures and toxic lunar dust, we explain the science and technology for this brave mission to happen. Follow our story filled with awe, danger, trepidation and share the wonder of the lunar environment made for 360 full dome format.

Prepare for a hostile and breathtaking lunar experience...

Tycho Goes to Mars

2021 27 min

Join Tycho, a dog that has a knack for getting into trouble, on his latest adventure as he discovers Mars up-close. See an ancient volcano, a gigantic canyon and help Tycho search for water to power his kennel back home. But how will he find water on Mars when it looks so cold, dusty and dry?

Luckily, he discovers a new friend, Oppy, who is all too eager to help. Oppy—the NASA rover, Opportunity—has lots of experience exploring Mars and hunting for water. She is thrilled to share her knowledge of the red planet with a fellow space explorer.

Languages: EN

Producer: Melbourne Planetarium - Scienceworks - Museum Victoria

NEW

Space Oases 3D

2022 37 min

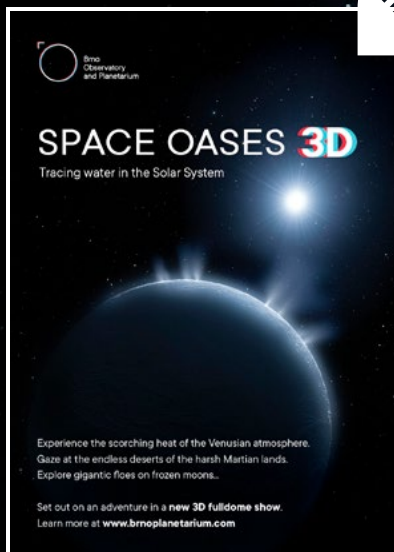

We are inhabitants of a water world. Water forms our planet as well as ourselves. Its possible shortage raises concern because we are well aware we cannot do without it. It should come as no surprise that searching for water in our vicinity – within the Solar System – is among the priorities of modern astronomy. We will trace water across the whole Solar System: in deep lunar craters, in deserts of Martian lands or on frozen satellites of Jupiter and Saturn. We will fly over gigantic ice floes, hidden oceans and icy showers of cryovolcanoes.

Languages: EN, CZ, FR

Producer: BRNO

Genre: Space, Moons, Water

Night of the Falling Stars

360 FULLDOME 4K 2019 19-22 min

One night a boy sets out to observe meteors on his secret hill. But on this night a mysterious old gentleman is also there, and then shooting stars begin raining down on them like a shower.

The two begin a magical journey going above the clouds and beyond Earth's atmosphere to approach the shooting stars finally reaching high enough to overlook the whole Earth.

Through this experience, the boy gains insight into the origins of shooting stars and meteor showers and takes an important first step toward his dream of becoming a scientist.

Unseen Universe

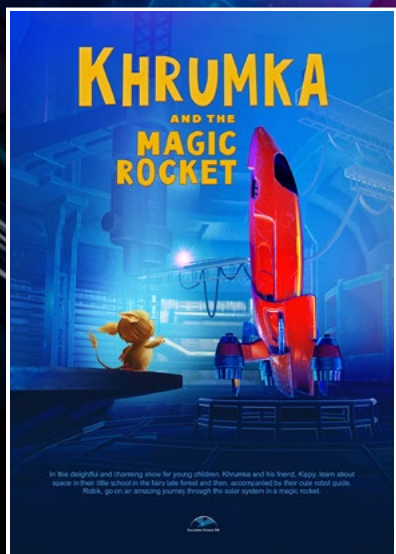

360 FULLDOME 4K 8K 2019 25 min

This exciting look into cutting edge astronomy explores the universe far beyond our human senses. For millions of years, our view of the heavens has been limited by our eyes, allowing us to only see a narrow band of electromagnetic radiation we call visible light. For the first time ever, in the greatest breakthrough since the invention of the telescope, we now have the technology to capture the Universe over an amazing width of the spectrum and beyond. We can even interlink telescopes around the world to capture data on a global scale.

Dinosaurs

A Story of Survival

2022 28 min

NEW

Celeste is fascinated with dinosaurs. She prepares a talk for her class about how they went extinct when Moon, a very wise and magical character, poses a tantalizing question: what if I told you that there are still dinosaurs among us? Celeste joins Moon in a journey through time. An exciting adventure that will show them the Earth as it was in the very distant past. They see the fascinating transformations that these animals underwent over millions of years, creating giant creatures, beasts and predators, until the day that a cataclysmic impact event causes mass extinction on Earth. All is not lost, Celeste discovers the key to survival.

Serengeti

2022 45 min

NEW

Life happened in the Serengeti on an unprecedented scale. It's home to most of Africa's iconic animals, and hosts one of the world's greatest natural events – the annual wildebeest migration. Nature has orchestrated a perfect symphony in which every species has a very distinct role to play in a larger story – the balance of an entire ecosystem. We'll see it through the eyes of the youngest members of our animal cast as they imitate their parents, and learn about the mighty roles they'll play. Prepare to be awed by this immersive giant screen film about how nature works in one of the world's greatest ecosystems.

Living Worlds

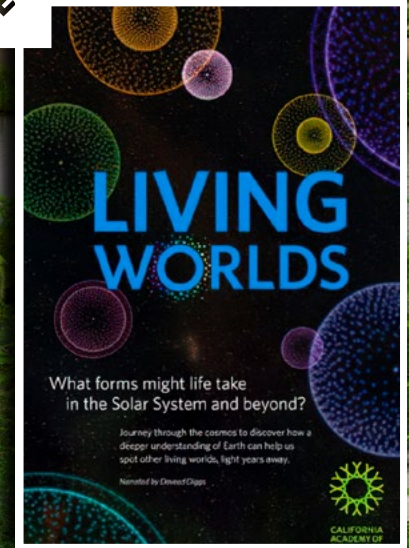

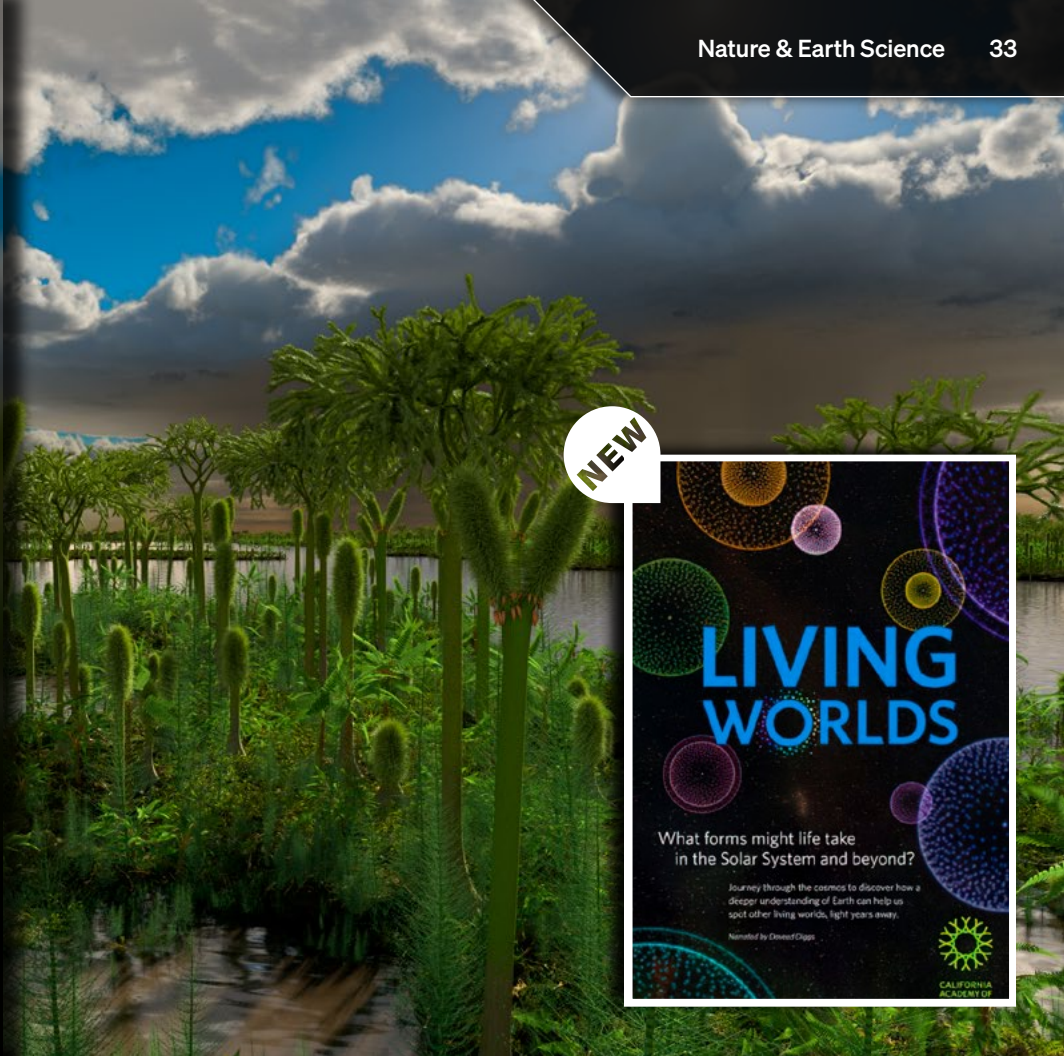

360° FULLDOME 4K 2021 27 min

Living Worlds invites you to journey through space and time to examine life as an essential quality of our home planet. Diggs takes you on an exploration of the co-evolution of life and our planet, revealing the ways in which life has transformed Earth's surface and atmosphere over billions of years. Along the way, you'll see how light and color can help us spot a living world, even from great distances. As we ponder what forms life might take in the Solar System and beyond, Living Worlds encourages us to consider how a deeper understanding of our own planet can aid in search for life across the cosmos, and to reflect on ways we can partner with our living world.

Everest

  **6K** 2020 40 min

In this special re-release of the hit film Everest, audiences will revisit the inspiring ascent of the world's tallest mountain with a team of four international climbers who find hope, beauty, and triumph in the wake of tragedy. Originally released in 1998, Everest was the fastest roll out ever for a giant screen film and landed on Variety's Top 10 Box Office list. The film shattered all previous attendance records and the highest grossing giant-screen documentary of all time. Digitally remastered in 16k resolution, this special edition will allow a new generation to experience this critically acclaimed film.

Ancient Caves

  **6K** 2020 40 min

Ancient Caves brings science and adventure together as it follows paleoclimatologist Dr. Gina Moseley on a mission to unlock the secrets of the Earth's climate in the most unlikely of places: caves. Moseley and her team of cave explorers travel the world exploring vast underground worlds in search of stalagmite samples – geologic “fingerprints” – that reveal clues about the planet's climate history. Their quest leads them to some of the world's most remote caves. Together, they go where very few humans will ever go, revealing the incredible lengths scientists will go to study the unknown.

Labyrinth

 **8K** 2020 24-45 min

A labyrinth is a space urging a person to constant movement. When viewed from above, we have an objectively distinguishable idea of a line, a pattern or an ornament. In a labyrinth, we fall under the visual impact of a particular configuration of space, which it is impossible to get out of, being stuck in the disorientation affect. We switch to a subjective perception of life. As we move continuously, the perception of the labyrinth space changes every second. Squares, streets, passages, corridors, rooms form a dynamic structure of the urban labyrinth while going through which we are influenced by numerous constantly changing images.
