

A large digital display showing a desert canyon scene with four people looking at it. The display is the central focus, showing a vast, golden-brown rock formation with deep shadows and bright highlights. Four people are standing in front of the display, looking at the scene. From left to right: a woman with long blonde hair in a light pink shirt and dark pants; a woman with long blonde hair in a black t-shirt and brown pants; a woman with long dark hair in a purple top and blue jeans; and a man in a light blue shirt and white pants. The background behind the display is a dark, solid color.

**POWERING  
EXPERIENCE**

# CXSYSTEM

Vertically Integrated Shared Reality Solution for Immersive Experiences

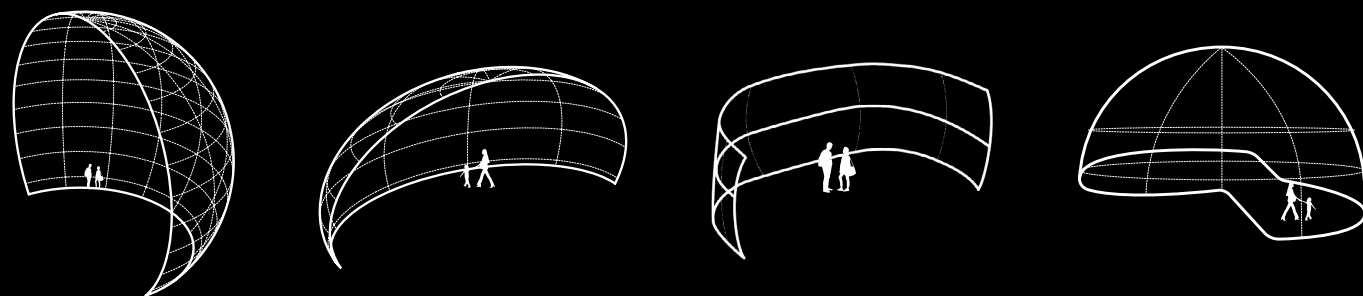

SHARED REALITY SOFTWARE

SOFTWARE DEFINED DISPLAY

CUSTOM ENGINEERED DOME

Wrap your audiences in experience with the most advanced immersive entertainment technology in the world.

## Step Into a Whole New Reality

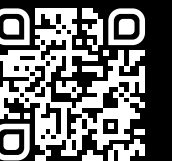

### The Power of Shared Reality

Cosm's CX System envelops the entire audience in a state-of-the-art LED Dome, transforming the space into anything imaginable. Step onto the field of your favorite sporting event, take a trip through space or enjoy front-row concert seats with your friends. This is Shared Reality, and its power is yours. Create extraordinary experiences for your guests and combine the best of both virtual and physical worlds.

### Come See for Yourself

Cosm is ready to show you how our immersive experience expertise can be applied to meet your customers' demands for awe-inspiring entertainment. Let us show you how we can put our unrivaled technology and know-how to work for you.

SEE IT TODAY

## When Innovation and Expertise Meet

For over 40 years, Cosm has been defining immersive experiences, from the world's first digital planetarium to flight simulators, theme park rides, and innovative computer graphics. Today, our advanced hardware and software engineering produces stunning realism, where the LED dome's surface disappears, and the audience feels transported.

## Shared Reality Software

Produce, manage, and present immersive experiences, from free-flowing live and interactive shows to scripted presentations and even real-time science simulations; our shared reality software enables you to engage and inspire your audiences in powerful ways.

### CX ENGINE

CX Engine is the world's best immersive experience engine. It seamlessly integrates advanced multichannel video, Unreal Engine, and real-time content so you can easily create exciting and engaging programming for your guests.

### DIGISTAR

Digistar is the world's most advanced planetarium software powering over 700 sites world wide. It's powerful real-time rendering engine can display the latest scientific data sets and astronomy models and its built in production tools make it easy for science communicators to explore the universe with their audience.

## Transport Your Guests to Extraordinary Worlds

Cosm's CX System is the best way to ignite your audience's passion. Create bespoke fan experiences with our Shared Reality software or leverage our catalog of immersive media to engage and inspire your community. With flexible programming options, you can keep guests coming back time and time again.

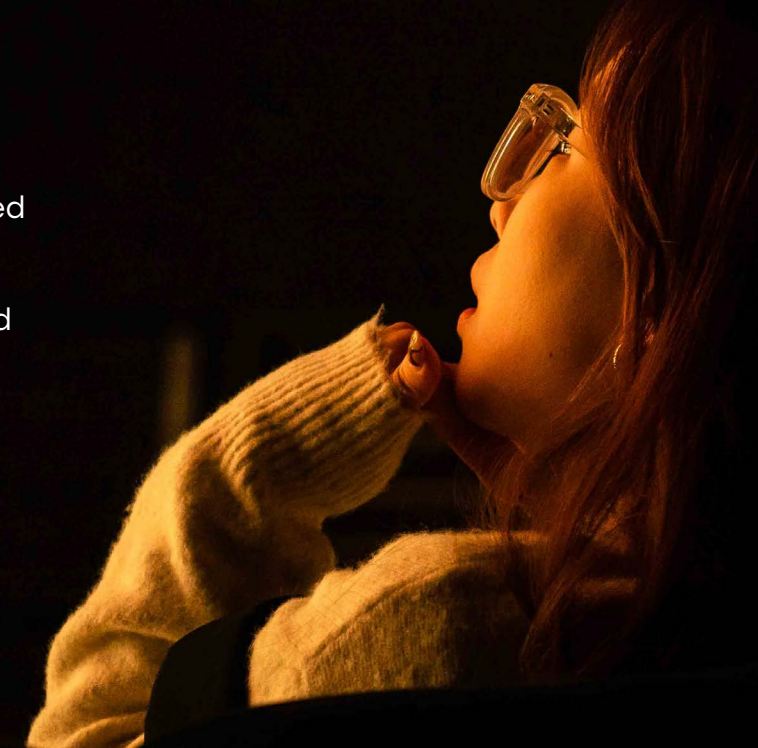

## Premium Media Programming

The Premium Media Program gives you easy access to a library of immersive films and additional resources to easily program custom immersive events. The continually growing library ensures you always have fresh, exciting content for your audience.

## Cosm Studios

We have gathered an interdisciplinary community of some of the most talented artists, filmmakers, technologists, and experience designers to push the boundaries of immersive storytelling and design. Providing you with continuous resources redefining how you can engage with audiences, cultivating unforgettable experiences.
