# BLACKHOLE

FIRST PICTURE

# OASIN IN SERTING ASING THE PACE

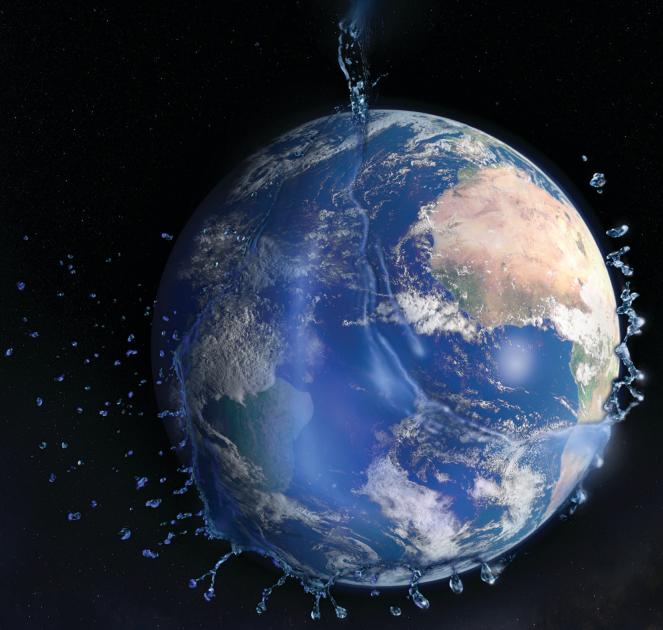

4K 8K 2023 25 min

Languages: EN, CN **Producer:** Cosm Studios Genre: Astronomy, Cosmology Following a journey of human perseverance, ingenuity, and imagination, fulldome film Black Hole First Picture encapsulates a historic milestone in science visualization and discovery - witnessing a phenomenon widely believed to be invisible: a black hole. Planetarium audiences around the world are taken on a quest that examines worldwide radio sites that comprise the Event Horizon Telescope (a global network of synchronized radio observatories that work in unison to capture images of black holes), peers into the core of the Messier 87 galaxy, and travels to the heart of the Milky Way to produce the first-ever picture of a black hole.

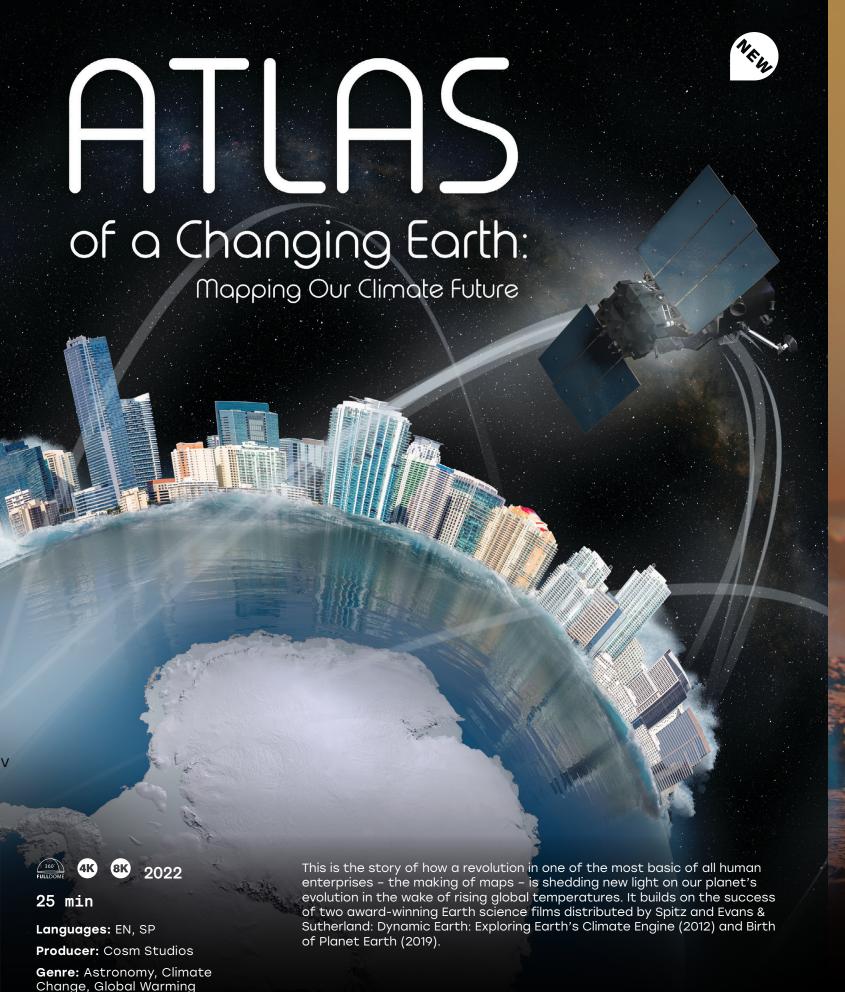

4K 8K 2022 25 min

Languages: EN, CN, SPA, FR Producer: Cosm Studios

Genre: Cosmology, Life Science & Nature, Solar System, Space Science & Astronomy, Weather

For over two decades, Oasis in Space has remained one of Spitz's most popular and evergreen productions. In 2022, the entire show was remastered with a gargeous, live-performer score, brilliant new visual effects and an updated script that reflects current advances in space science. Once more, we are ready to take the audience on a rich and fascinating journey through our celestial neighborhood, as we look for one of organic life's key ingredients - liquid water.

# ONE THOUSAND ONE

52 min, 42 min, 30 min

Languages: EN, GE, DU, FR, JP, MA

Producer: Mirage3D, E&S, GOTO Inc

Genre: Space Travel

An international crew of astronauts is about to embark on the first interplanetary journey in history, the first manned mission to the surface of Mars. Reporter Miles O'Brien is reporting live from his Space Headquarters TV Studio in New York while events unfold for the crew on their 1001 day long mission.

We will witness firsthand their brave attempts to put human footprints on Mars and return safely to Earth. This journey is made possible by the biggest engineering feat ever and loaded with scientific experiments. The explorers will be extending our knowledge of Mars and will be learning whether or not mankind has a future among the stars. Experience the thrill of the grandest mission of exploration ever undertaken!

# **Space Explorers**

The ISS Experience

360 4K 2 2021 20 min

In spring 2021, Felix & Paul Studios sent the first-ever cinematic 3D 360° camera designed to operate in the vacuum of space to the International Space Station. The result is a spectacular fully immersive experience that will allow you to witness the world's first spacewalk captured in cinematic VR as if you were actually there. Take in a view of our world like never before. Features ESA Astronaut Thomas Pesquet and JAXA Astronaut Akihiko Hoshide.

Languages: EN

**Producer:** Felix & Paul Studios Genre: Astronomy, Live Action

# Moonbase:

The Next Step

4K 2 2022 20 min

Moonbase: The Next Step is the story of this human endeavour, pushing scientific and technological advances to the limit. Traveling the 250,000 miles and surviving the hostile and alien conditions of reduced gravity, extreme temperatures and toxic lunar dust, we explain the science and technology for this brave mission to happen. Follow our story filled with awe, danger, trepidation and share the wonder of the lunar environment made for 360 fulldome format.

Prepare for a hostile and breathtaking lunar experience...

Languages: EN **Producer:** Moonraker

Producer: GOTO Genre: Astronomy

# **Space Oases** 3D

We are inhabitants of a water world. Water forms our planet as well as ourselves. Its possible shortage raises concern because we are well aware we cannot do without it. It should come as no surprise that searching for water in our vicinity - within the Solar System - is among the priorities of modern astronomy. We will trace water across the whole Solar System: in deep lunar craters, in deserts of Martian lands or on frozen satellites of Jupiter and Saturn. We will fly over gigantic ice floes, hidden oceans and icy showers of cryovolcanoes.

# **VOYAGER**

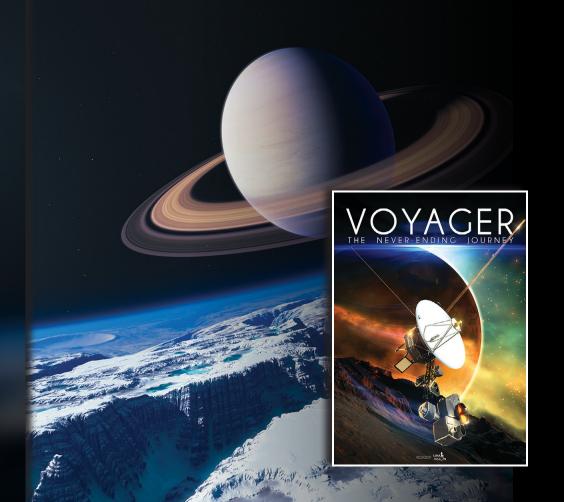

10 € 2019 27 min

In 1977 two space probes were launched to explore the farthest planets of the Solar System: Jupiter, Saturn, Uranus and Neptune along with their moons. These spacecraft greatly enriched our knowledge of the distant worlds. Now, after four decades, they explore interstellar space like two bottles launched into a cosmic ocean, carrying "The Golden Record" an interstellar message intended for any alien civilization.

**Producer:** Uma Vision Genre: Space Travel, History

# Áróra

An immersive experience about the beauty of auroras. Take a journey across time and space to understand the science behind the phenomena and to experience the stories of our ancestors, guided by the lullaby of the dawn goddess. This cinematic adventure invites the audience to join the dance of these eerie lights over remote Icelandic landscapes.

# Cosmos Odyssey

Cosmos Odyssey explores the history of the universe and of the human effort to understand it. Starting from the mythological universe of ancient times, we examine Ptolemy's geocentric theory, the heliocentric theory, the revolution brought by the invention of the telescope. spectrum analysis, and the latest technologies in today's astronomical observatories.

# **Destination Mars**

The New Frontier

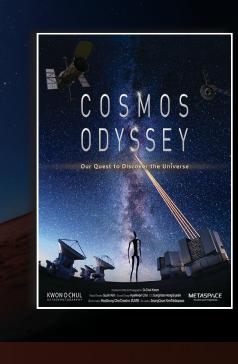

4K 2018 30 min

Ever wonder what it would be like to fly to Mars? NASA, and others, have their sights set on the Red Planet and they're building the technology to get us there! Explore the work being done around the globe to help make the dream of getting humans to Mars a reality. Fly through the International Space Station, where astronauts are already living and working in space, and follow the rockets and vehicles that will take humans beyond the Moon and, one day, all the way to Mars! Travel along as we imagine this remarkable journey.

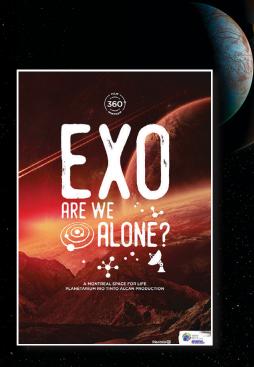

Languages: EN

**Producer:** Charles Hayden Planetarium Genre: Space Travel, Other Sciences

#### **Unseen Universe**

This exciting look into cutting edge astronomy explores the universe far beyond our human senses. For millions of years, our view of the heavens has been limited by our eyes, allowing us to only see a narrow band of electromagnetic radiation we call visible light. For the first time ever, in the greatest breakthrough since the invention of the telescope, we now have the technology to capture the Universe over an amazing width of the spectrum and beyond. We can even interlink telescopes around the world to capture data on a global scale.

Languages: EN, MA, SP **Producer:** Cosm Studios Genre: Astronomy

# **Beyond the Sun**

Celeste is a little girl who wants to explore the Universe, find new Earths and learn how to find exoplanets. While fighting off sleep in her room by reading a book on astronomy, she receives an unexpected visit from the Moon. Together, they enjoy a journey through the Universe to discover what exoplanets are and how they can be detected. They observe rogue planets, oceanic worlds and super-Earths. The Moon tells her about exoplanet hunters, who observe the sky in search of planets like Earth.

# **Birth of Planet Earth**

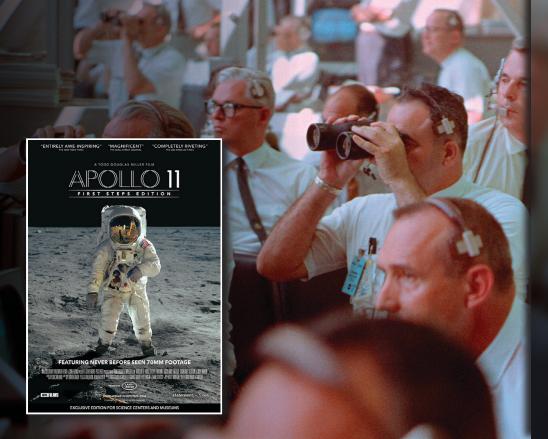

**4K** 8K 2019 24 min

Birth of Planet Earth tells the twisted tale of our planet's origins. Scientists now believe that our galaxy is filled with solar systems, including up to a billion planets roughly the size of our own. The film employs advanced, data-driven, cinematic-quality visualizations to explore some of the greatest questions in science today: How did Earth become a living planet in the wake of our solar system's violent birth? What does its history tell us about our chances of finding other worlds that are truly Earth-like?

#### The Great Undersea Adventure of Barney and Beenie

4K 2022 26 min

A lone climber, suspended hundreds of feet in the air, struggles to find the next finger hold, defining progress in inches. The dramatic visuals immerse us in a gripping contest of human determination versus the reality of gravity's potent grip. MOUNTAIN QUEST explores the precarious relationship of humanity's quest to scale some of the world's highest places, while also revealing the scientific and technological advances that have enabled us to conquer these peaks, exposing the heartbeat of the human soul.

#### **Robots**

📷 🖾 4K 🏡 2015 40 min

Today's robots are nothing short of astonishing. Those coming in the not-too-distant future are simply revolutionary—and they are becoming eerily like us. What does it take to make a humanoid robot-a robot that can do anything we can do without the benefit of a human brain? How close are scientists to replicating some of the particularly challenging human characteristics? (Think fingers and toes.) Why are we even attempting to create humanoids in the first place? ROBOTS 3D answers these questions and more as it showcases the latest developments-the successes and failures-of robotics around the world.

# Piano Under the Stars

₩ 2020 25 min

Piano Under the Stars is an AstroArt fusion film for dome theaters by renowned Chilean pianist/composer Claudio Recabarren Madrid. The film features original piano compositions with ethno-symphonic musical arrangements such as voice, wind, and ancestral percussion. Original immersive imagery lends artistic, cosmic layers to the work, creating a sensory relationship with the music being performed.

Languages: EN

Producer: Claudio Recabarren

Genre: Ethno Symphonic Pop

# Labyrinth

8K 2020 24-45 min

A labyrinth is a space urging a person to constant movement. When viewed from above, we have an objectively distinguishable idea of a line, a pattern or an ornament. In a labyrinth, we fall under the visual impact of a particular configuration of space, which it is impossible to get out of, being stuck in the disorientation affect. We switch to a subjective perception of life. As we move continuously, the perception of the labyrinth space changes every second. Squares, streets, passages, corridors, rooms form a dynamic structure of the urban labyrinth while going through which we are influenced by numerous constantly changing imáges.

Languages: EN

Producer: Sergey Prokofyev Genre: Abstract Arts, Light

#### Flow

Visions of Time

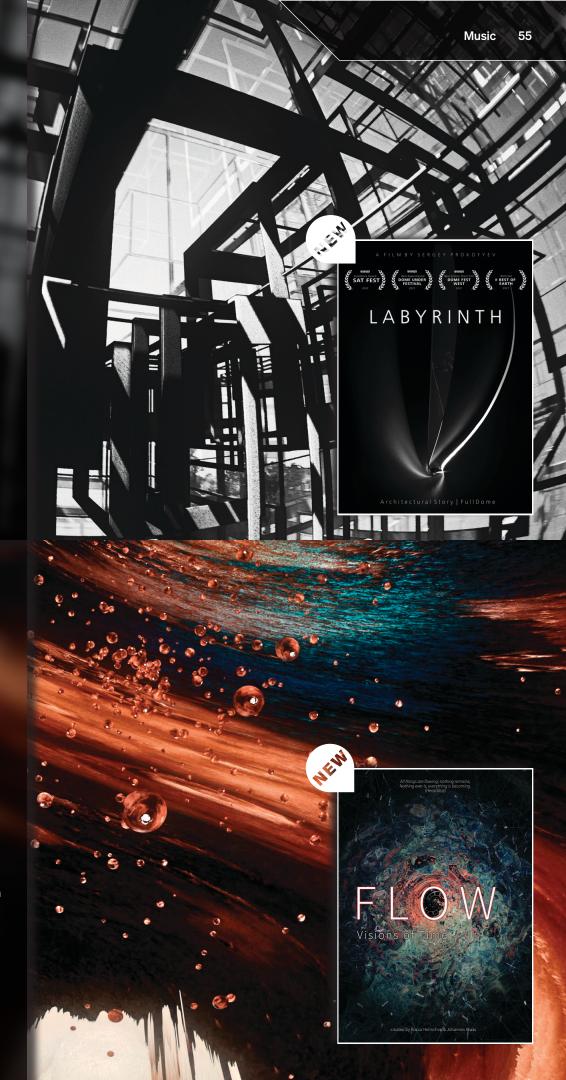

Time is and has always been fascinating, because it always surrounds us, yet it is so intangible and abstract. Flow: Visions of Time« tries to get closer to this very mysterious force in an entertaining and thought provoking way. A combination of time-lapse footage, associative visualizations and artistic interpretations of time in a lot of shapes and sizes are woven together with the music in an attempt to explore the essence of time. The result is a non-narrative fulldome arts and music film in the shape of an immersive audiovisual concept album.
